

BISCOLOGO

In addition to be a tasty wafer decoration to put on top of ice cream, the **Biscologo** is also an effective way to promote your ice cream shop.

We can create this product with your **customized logo** printed on it, simply and quickly.

Please, follow this few simple steps to achieve **the best printing quality**.

- Please note that prints are always monochrome (*certified food-grade inks, cocoa color*) and your logo will be printed within an area of approximately 5x5 cm. A design with too many elements or colors would take away space from the main image you wish to highlight.
- For the creation of your prints, please always provide us with **High Resolution graphic files** (300 DPI), preferably vector type (PDF-AI or PNG-JPG). The best printing results are obtained from line art, with solid (not shaded) backgrounds.
- After the graphic adaptation of your logo, we will send you a draft sample. To proceed with the printing of the disc with your logo, we will always require your express approval, with a signed confirmation, at the bottom of our draft.
- After the approval of the draft, we will proceed with the printing of the discs within 5 to 15 days, and they will be shipped to you.
- The production of a print batch always requires an initial technical setup which extends the normal production times. It is possible to print discs with logo starting from **a minimum batch of 16 boxes** (16,000 pcs). Obviously, larger quantity batches will always benefit from a more advantageous price.

EXCLUSIVE MULTISUBJECT PRINTING

An exclusive novelty of the Biscologo Coni Perfetto is the ability to print, within the same production batch, up to 20 (twenty!) different subjects, in sequence, all in the same box!
